

WHITEPAPER

**UNIPAD**—MULTICHAIN DECENTRALIZED IDO LAUNCHPAD  
PLATFORM

# INTRODUCTION

UNIPAD – Multi-Chain Decentralized IDO Launchpad Platform powered by the UNP token. UniPad is the token enrichment network. UniPad is driving the next generation of projects to launch in a fair and decentralized manner across multiple chains.

## **Multichain IDO launchpad supports following blockchains:**

- Ethereum chain
- Binance smart chain
- Tron chain
- Polygon/Matic
- Polkadot
- Solana

**UniPad**

# UNIPAD TOKEN FEATURES

The UniPad smart contract applies a 10% fee on all transactions(buys/sells). Out of this, 5% is automatically Distributed to holders, without farming! This means the Amount of token in your wallet will forever increase as people transact. This way impermanent loss(IL) is avoided altogether and in effect you get paid for just holding UniPad Token.

In addition, the UniPad smart contract also takes 5% of each transaction and automatically adds it to the liquidity pool. The liquidity pool will continuously increase, which Leads to a higher price floor of UniPad.

## **This is what UniPad aims to accomplish:**

You don't have to farm, stake or deposit your UniPad token. Simply hold it in your wallet and you will get more!

**UniPad**

# OVERVIEW

UniPad is an autonomous yield and liquidity generation Protocol that aims to directly reward its holders whilst concurrently increasing liquidity.

This is funded by a 10% tax taken from each and every transaction.

Consequently, the protocol has a permanently increasing price floor, with all investors earning additional UniPad tokens just for holding.

## 10% tax divided into two equal parts:

50%

Distributed proportionally across existing **HOLDERS**

50%

Transformed into BNB/UniPad LP Tokens, and added to **LIQUIDITY**

UniPad

# REFLECTION

UniPad resides within a class of token that rewards investors just for holding, the amount of rewards received increases over time the longer an investor holds for.

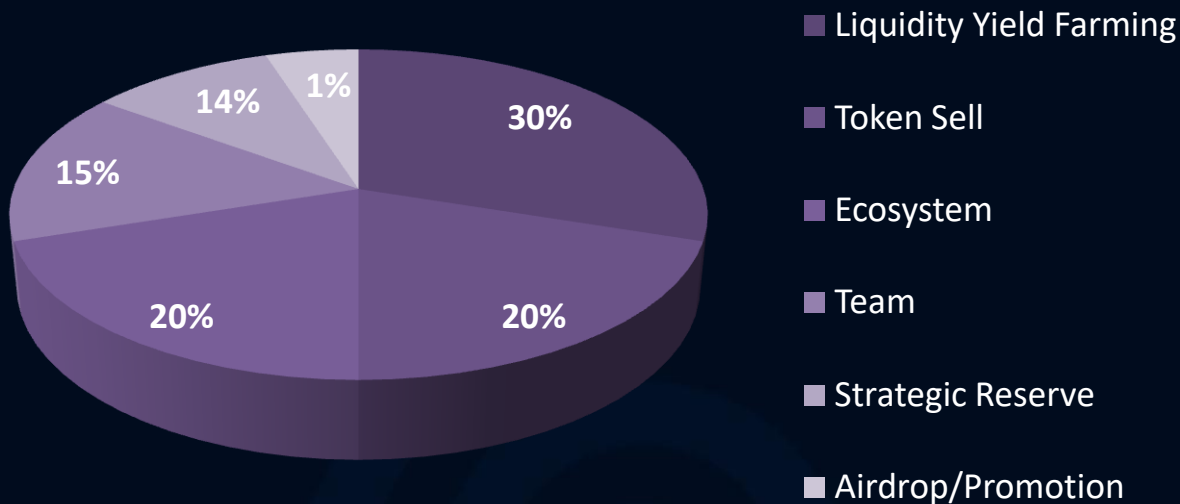

Holders are also rewarded for the success of UniPad with higher transaction volumes leading to increased fees, and rewards for distribution.

We believe this mechanism provides investors with an active stake in UniPad success!

UniPad

# TOKENOMICS

**The initial minted supply of UniPad token (\$UNP) is 100,000,000**

- 20% (20,000,000 UNP) will be reserved for the IDO (Initial Dex Offering).
- 30% (30,000,000 UNP) will be reserved for Liquidity Yield Farming (UNP, UNP-BNB LP) purposes.
- 20% (20,000,000 UNP) will be reserved for Ecosystem.
- 15% (15,000,000 UNP) will be reserved for the Team.
- 14% (14,000,000 UNP) will be reserved for Strategic reserve.
- 1% (1,000,000 UNP) will be reserved for the Airdrop/Promotion.

**UniPad**

# TOKEN VESTING PERIODS

- Team - 6 months lock then vested over 15 months.
- Staking and Yield-Farming - TBG
- Ecosystem - 20% unlock TGE then vested over 12 months.
- Strategic reserved - 10% unlock TGE then vested over 12 months.
- Airdrop/Promotion - 20% unlock TGE then vested over 12 months.

# ROADMAP

## JULY 2021

- Official website launch
- Social media account setup
- UniPad contract white paper release
- Airdrop distribution phase 1
- Private Round token sell

## AUGUST 2021

- Global Marketing initialize
- New partnership with project's
- Focus plan release for community growth
- Public Round token sell

## SEPTEMBER 2021

- Airdrop distribution phase 2
- Initial token listing on pancakeswap and bakeryswap

## OCTOBER 2021

- Development team expansion
- Community live events
- More use-case will add to UniPad

## NOVEMBER 2021

- Multichain decentralized IDO launchpad will be live on UniPad
- Binance chain, Ethereum chain and Polygon will be supported initially on launchpad

## DECEMBER 2021

- Solana and Polkadot will be supported on launchpad
- Airdrop distribution phase 3
- \$UNP Buyback and burn event will be start
- Major CEX listing

## JANUARY 2022

Coming soon.....
